Session 2020-21

EARTH DAY CELEBRATION

Earth Day is a global phenomenon that is celebrated annually on April 22 to show concern and support for mother nature. It was first celebrated on 22nd April 1970, to get everyone to do their part towards the environment.

Earth day was digitally celebrated by the students of DPS Kolar. Celebrations and a medley of educational and fun activities, helped students to understand and spread the message that we need to care for mother earth.

Nursery and Prep students engaged in day-night themed activity, eco-friendly collage making competition, and put magazines and unwanted scraps of paper to good use by creating Earth day themed collages. It was wonderful to watch young minds churn out astonishingly fresh ideas. An online poster making competition was organized for the students of class 1. The enthusiastic participants made posters showing how can we save our mother earth. To practically demonstrate support for environment protection 'Recycle Garden competition' was conducted for the students of class II This helped students assimilate simply yet clearly that our natural resources are limited and we need to use them judiciously.

Senior students put up a special assembly, which included positive news about Nature by young environment reporters. Interesting and relevant information of low levels of pollution, clean waters of the Ganga and Yamuna, sightings of rare birds and animals in various places of India were shared by the young reporters. A song by another talented DIPSITE conveyed how our earth is precious and needs to be protected. The celebration ended with a heartfelt message by students that rekindled emotive concerns and urged youngsters to save, love and respect mother nature with all their heart and soul.

The principal Mrs. Vandana Dhupar congratulated the students on their efforts to come together for a digital celebration. She also encouraged all members of the DPS Kolar family to be sensitive to mother earth and her needs.

DPS KOLAR ROAD celebrates
'EARTH DAY'

The Principal and Students of
classes III to VIII cordially invite you
to witness a special
video presentation
to commemorate
'EARTH DAY'

Earth Day

creation of our Mind*

DPS Kolar celebrates Ambekar Jayanti & Baisakhi

Special Online Assemblies on Ambedkar Jayanti were conducted by the students at different levels. The students and teachers met over Zoom, virtually, and celebrated the life and achievements of Dr. B R Ambedkar.

The assembly commenced with the National Anthem followed by a special prayer by the Headmistress, Mrs. Anuradha Telang.

Special scriptures, thought of the day, theme talk and a quiz were also included in the assembly.

Masterchef Anakh Narula of class 6 shared an easy recipe on this festive occasion.

A short but inspirational talk on the life and works of Ambedkar Saheb was presented by Dr. Bhavna Chaturvedi, Hindi teacher. The highlight of the assembly was the principal, Mrs. Vandana Dhupar's address to the parents and students. She conveyed her greetings on the occasion of Baisakhi and Ambedkar Jayanti and spoke of the school's untiring efforts in ensuring that learning does not break, come what may.

The assemblies were hugely appreciated by parents and students alike.

One of the first conditions of happiness
Is that the link between man and nature
shall not be broken

THE WRATH OF THE CROWN – COVID-19

**It all began in the sleeping giant,
And started spreading like a wild fire.
To begin with the world was silent,
The masses ignorant of the consequences so dire
The countries so mighty fell prey to the virus,
It shattered all the myth and the tyrus.
The business trembling, economy is at loss,
The administration is stringent to fight the cause.
The inventors are yet to find a cure,
The future seems so grim and unsure.
In this entire embroil and embrangle,
Doctors are our hope and ministering angel.
We must keep hygiene and social distance,
By this ensure our assistance.
To fight off this problem,
And our earth will soon again blossom**

THE LOCKDOWN

**Yeah! My exams are over ‘finally’,
I’m a free bird, literally !
The world is locked-down suddenly,
Oh no! I can’t go out, actually.
Corona has made us stay at our place,
No Malls, No Movies, No plays !
Can’t meet friends and classmates,
Soap, Mask and sanitizer are now the best mates !
It’s time to make some Art,
Stay at HOME, be SMART !
Enjoy your hobbies, practice your skill,
Spend time with family; have fun and chill !
I help mom with dusting and mopping,
Mom rewards me by hugging and kissing !
Thanks dear teachers for teaching us online,
I shall revert - Study well; the turn is mine !**

A GLIMPSE OF QUANTUM MECHANICS

Quantum mechanics is a branch that deals with mathematical description of motion and interaction of subatomic particles integrating the theories of wave-particle duality, the corresponding principle and the uncertainty principle.

For more than 200 years, numerous scientists observed light to be only a form of energy until Max Planck introduced the world with the effect of a radiation on a 'blackbody', however he wasn't the only one to be credited, other scientists like Albert Einstein and Neil Bohr also contributed in the foundation of the Quantum theory.

Planck's theory on radiant energy, that it is made up of components called quanta was acknowledged greatly because it answered the previously unexplainable natural phenomena of heat in solids and nature of light absorption. He also observed that energy has the characteristics of physical matter. These studies rewarded him with a Noble prize.

Quantum Mechanics is a specialized field of physics that can explain strange results about the physical world and defies what the classic mechanics illustrates. Classic mechanics says a certain object is in a specific place at a specific time however, in **quantum mechanics**, objects instead exist in a haze of probability; they have a certain chance of being at point x, another chance of being at point y.

In conclusion, Quantum mechanics, part of quantum field theory, is a fundamental theory in physics. It describes the physical properties of nature on an atomic scale.

Celebration of Mothers Day and Fathers Day

‘MAA.....Mother’s day together’, a special online session was organized for mothers of our young DIPSITES. It was heart warming to see mother child engage in activities and spend quality time together.

Academic coordinator Mrs. Remy Behl wished all the mothers and urged the children to imbibe virtues from their mothers. A memorable day indeed!

Young DIPSITES celebrated Fathers Day by participating, with their fathers in father-child duo dance performances, music and yoga sessions.

The kids expressed their love for their fathers by conducting various interesting, fun based activities.... ‘delicious Monaco pizza’ , ‘My footprints.... My shadow’, ‘Photo Frame making’ and ‘Thank you card’ making activity.

*My mother is my first friend,
my best friend, my forever friend...*

When I grow up, I want to
be just like my dad...

*"Imagination is
everything.
It is the
preview
of life & coming
attractions."*
